

# FARMADA

## Born to Farm

Farming and ranching are the most hereditary jobs in the US. A recent study showed 56.3% of farmers and ranchers are most likely to have a parent do the same.

By being born into it, and raised to farm, farmers can lay claim to being some of the most experienced professionals out there. Experience is the key ingredient that helps ensure long term sustainability. It is what drives decision making. It is often the difference between failure and success!

Experience is what motivated Farmada™ to develop the Elxir™ fertilizer bar. The first four founding members of Farmada™ have over 100 years of experience developing, manufacturing, selling, and marketing agricultural implements! We saw the market need for versatile and cost-effective toolbars and proceeded to develop the 5 section Elxir™ fertilizer bar:

## Key Features of 40 ft 5-section Elxir™ toolbar from Farmada™

# Elxir™ Precise Depth Control Mechanism

The frame can flex down 15 degrees per section (unlimited up flex). This lets the implement run over or along terraces while maintaining accurate working depth.

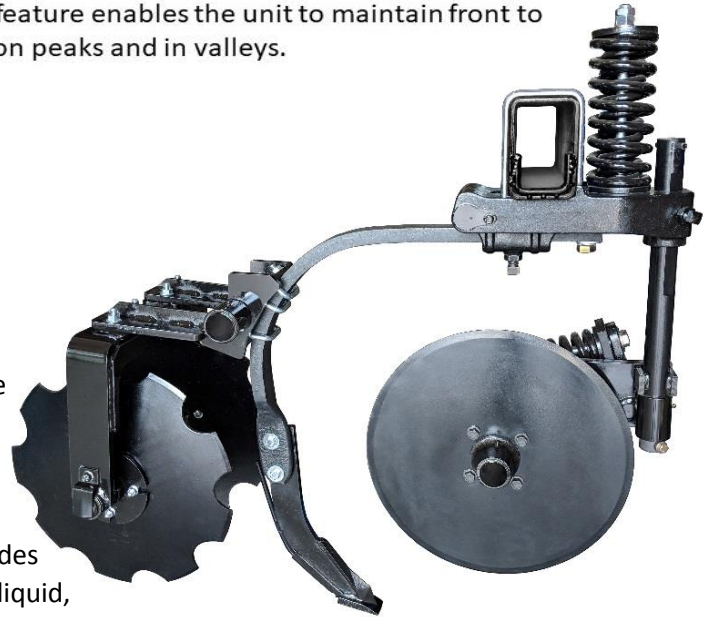

Working depth on the Elxir™ is measured off the front and rear gauge wheels. Combined with the floating tongue this feature enables the unit to maintain front to back depth on peaks and in valleys.

## Standard Features

- ◆ 1 3/4" / 4.45cm medium carbon steel shaft
- ◆ 4" / 10.2cm vertical travel of blade and shank
- ◆ Up to 800 lb / 362 kg of down pressure
- ◆ Shanks and knives consist of 5160 USA made spring steel
- ◆ Shanks accept industry standard knives
- ◆ Maximum utility of sealers – they can run in multiple blade positions, angles or even as “hippers”

## Options

- ◆ 20" / 50cm smooth or wavy blades coultter blades
- ◆ 14" / 35.5cm to 18" / 45.75cm notched or smooth sealer blades
- ◆ 450 styles of knives for virtually any agronomy plan: NH3, liquid, dry, Nutrisphere or any fertilizer combination!
